

NEURO4J STUDIO – INSTALATION GUIDE

PDF version available online at <http://static.neuro4j.org/download/doc/studio/StudioInstallationGuide.pdf>

INSTALLATION STEPS

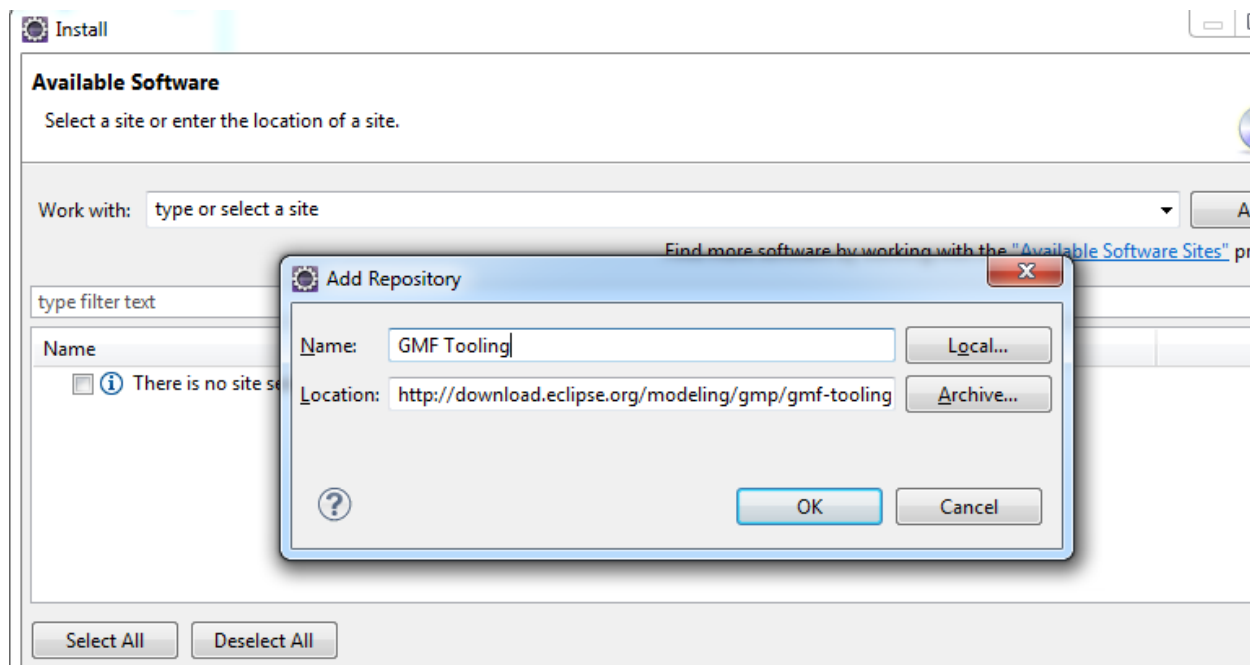

Neuro4j Studio is based on Eclipse (see <http://www.eclipse.org>).

Latest version of Studio is available on Download page (<http://neuro4j.org/download>)

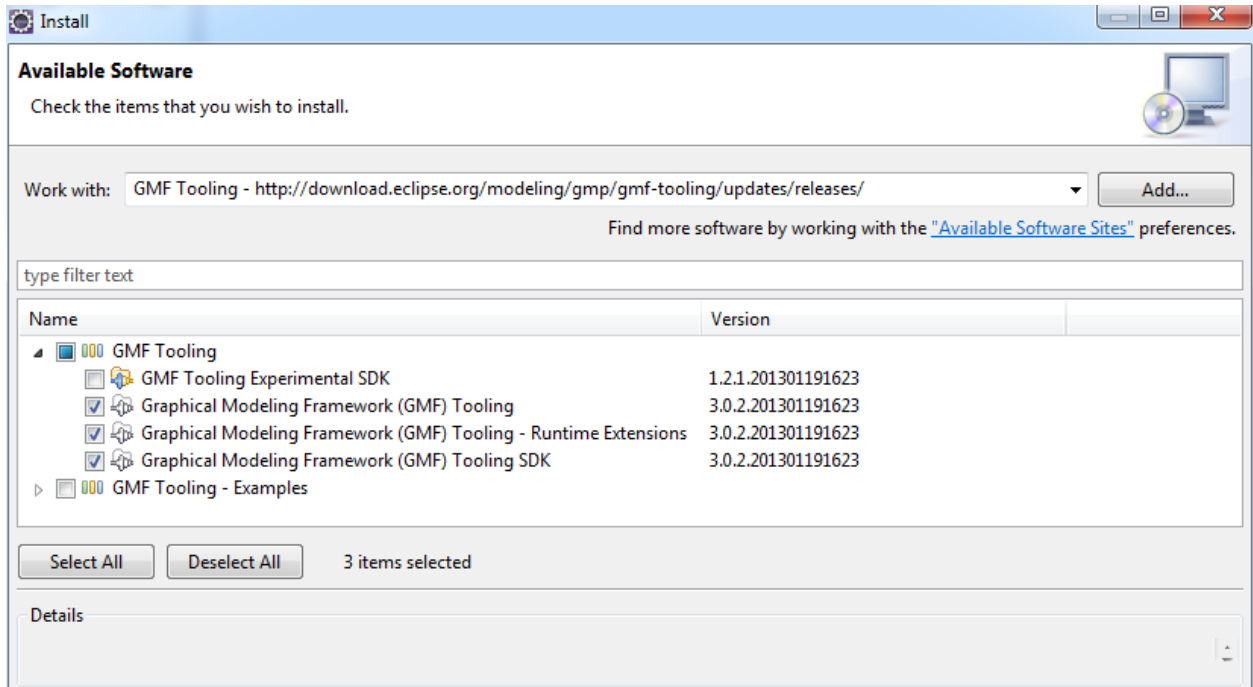

To install Neuro4j Studio follow these steps:

INSTALL ECLIPSE JUNO FOR JAVAEE DEVELOPERS WITH GMF TOOLING

- 1) Download and unzip **Eclipse Juno for Java EE Developers** <http://www.eclipse.org/downloads/packages/eclipse-ide-java-ee-developers/junosr2>
- 2) Update GMF Tooling
 - a. Click Help->Install New Software
 - b. Add new repository with location:
<http://download.eclipse.org/modeling/gmp/gmf-tooling/updates/releases/>

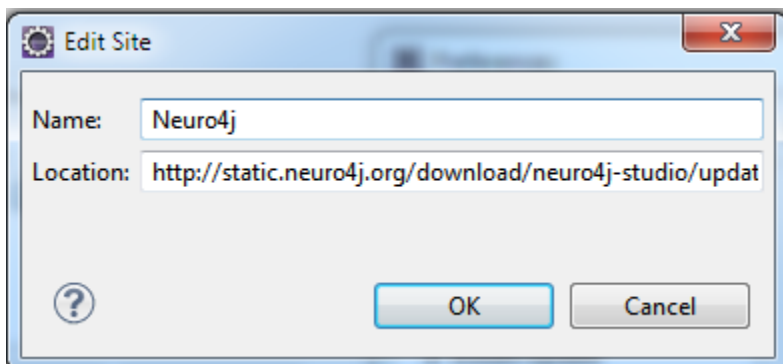

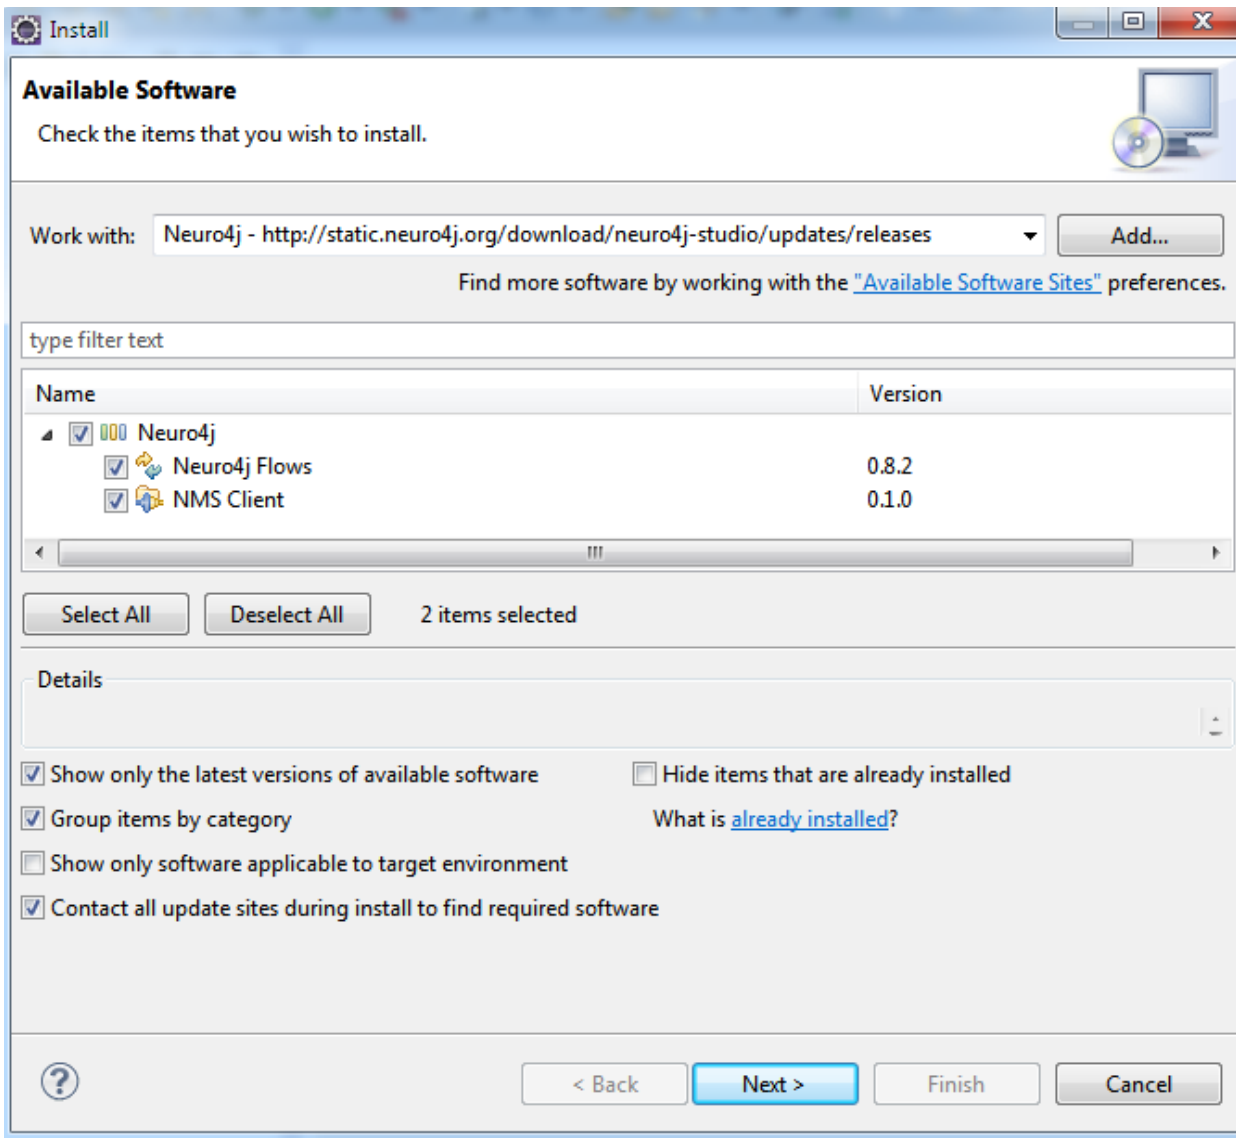

- c. Select GMF Tooling, Runtime Extensions and Tooling SDK and Click **Next**

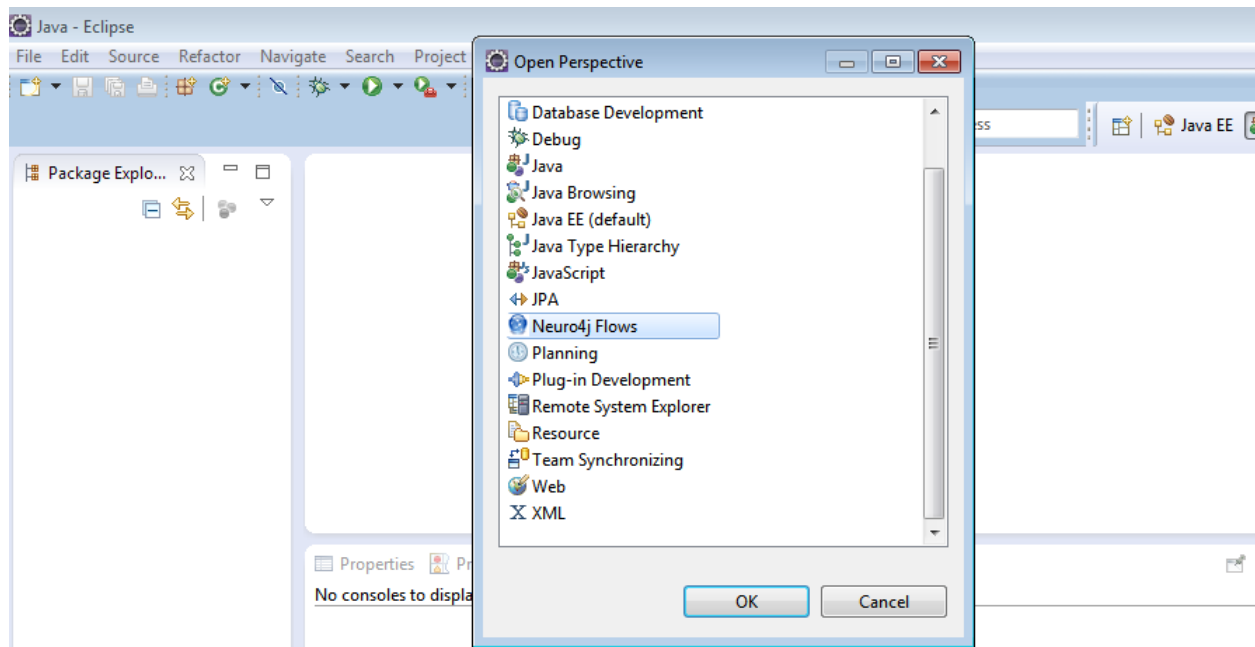

INSTALL NEURO4J FLOW EDITOR AND NMS CLIENT PLUGINS

- d. Click Help->Install New Software
e. Add new repository with location:
<http://static.neuro4j.org/download/neuro4j-studio/updates/releases>

- 3) Click Next->Finish;
- 4) Re-start Eclipse;
- 5) Open perspective "Neuro4j Flows";

6) Open perspective “Neuro4j NMS Query”;
